

Batch Exporting Media from Telegram

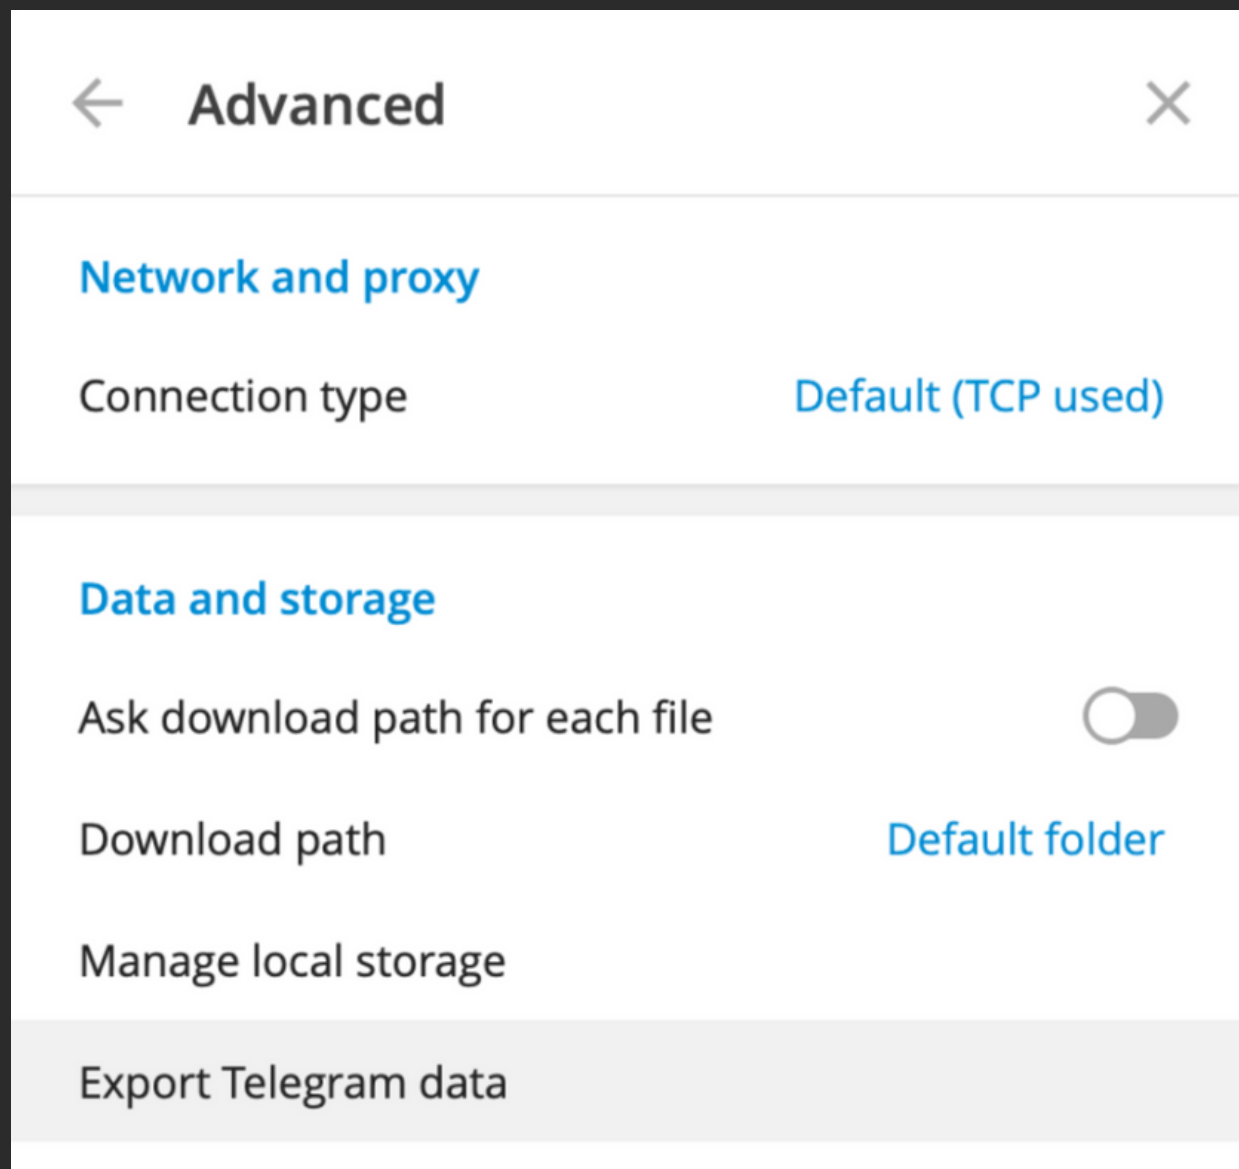

Batch Exporting Media from Telegram

You can export videos from channels, public and private group chats, and non-secret chats in batches on a computer using Telegram Desktop's **Export Chat History feature**

Mac users: Export Chat History is only available on the version of Telegram Desktop downloadable on <https://desktop.telegram.org/>, **NOT** the versions on <https://macos.telegram.org/> nor the Apple App Store.

Batch Exporting Media from Telegram

You can also export chat histories under **Settings > Advanced** on Telegram Desktop

Batch Exporting Media from Telegram

Telegram's Export feature provides options for batch exporting by **type**, **maximum file size**, and **date range**

☒ Stickers

☒ GIFs

☒ Files

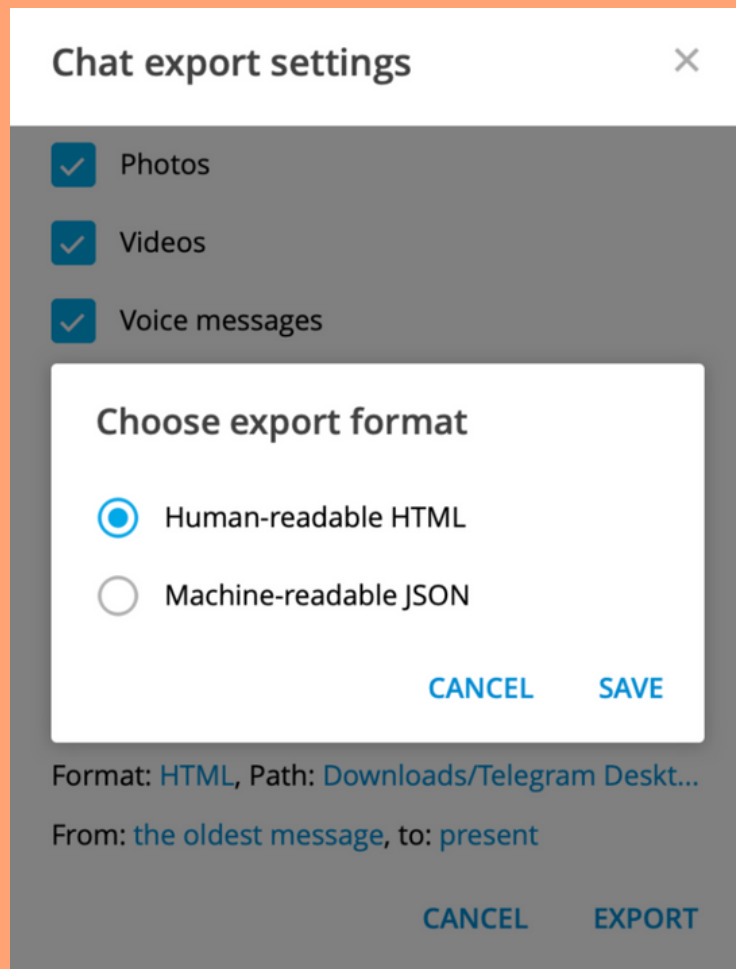

Size limit: 1800 MB

Format: [HTML](#), Path: [Downloads/Telegram Deskt...](#)

From: [the oldest message](#), to: [present](#)

[CANCEL](#) [EXPORT](#)

Batch Exporting Media from Telegram

You can choose **HTML** or **JSON** as formats for the chat text

CHOOSE HTML

This will give you the chat history with formatting tags that will allow you to present the exported chat visually in a browser

CHOOSE JSON

This will give you a chat history with tagged metadata, but without formatting tags, that you can view or machine-process as plain text

Preserving the relationship between media and chat text

HTML and **JSON** chat histories will only indicate the filename of attached media if you export the media with the text:

```
"edited": "2022-03-03T12:41:05",  
"from": "Kyiv Post",  
"from_id": "channel1283201591",  
"photo": "photos/photo_335@03-03-2022_12-40-23.jpg",  
"width": 1280,
```

Chat history “photo” tag when photo **is** exported with the text.

```
"edited": "2022-03-03T12:41:05",  
"from": "Kyiv Post",  
"from_id": "channel1283201591",  
"photo": "(File not included. Change data exporting settings to download.)",  
"width": 1280,
```

Chat history “photo” tag when photo **is not** exported with the text.
